CALL FOR PAPERS

Artificial Intelligence (AI) technologies hold immense promise for developing countries by offering innovative solutions to longstanding challenges. By leveraging AI in healthcare, education, economic development, infrastructure, and resource management, these countries can potentially leapfrog traditional development stages and improve the quality of life for their populations.

I2COMSAPP aims to provide an excellent opportunity to gather experts, researchers, practitioners, and innovators from various fields to explore the latest advancements, challenges, and practical implementations of artificial intelligence and machine learning (ML) technologies.

SUBMISSION & PUBLICATION

We solicit original contributions illustrating the latest research advancements and practical implementations of AI/ML technologies, with a particular emphasis on their potential to drive positive change in developing countries:

- Contributions should not have been published elsewhere or be under consideration for publication.
- Contributions should be written in English and formatted using Springer style template, available for download at the link (scan QR code).
- Contributions should be submitted in full length, between 8 and 15 pages, via the submission system (scan QR code).
- Submissions will be rigorously peer reviewed, and checked against any kind of plagiarism,
- Accepted and presented contributions will be published by Springer in its Scopus indexed LNNS book series (included in the Web of Sciences).
- Selected outstanding papers will be invited to submit an extended version to some reputable journals, which will be indicated later.
